Turn Off Water Supply • Cierre el suministro de agua • Couper l'alimentation en eau

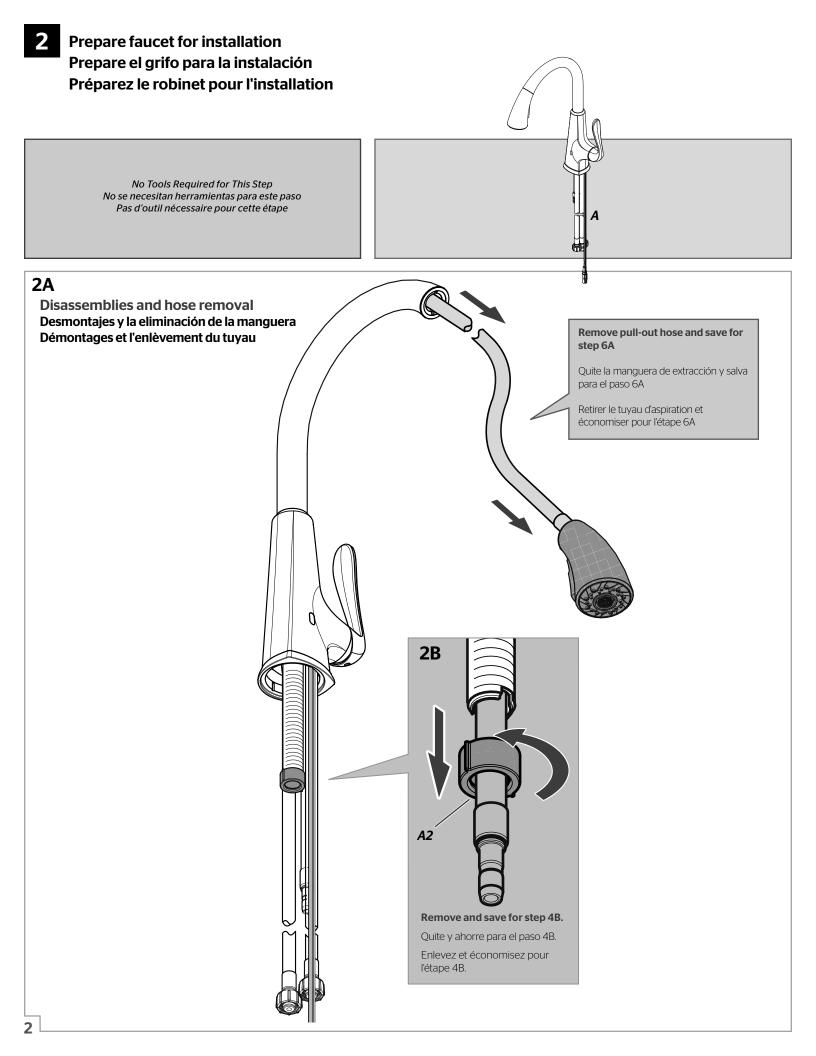

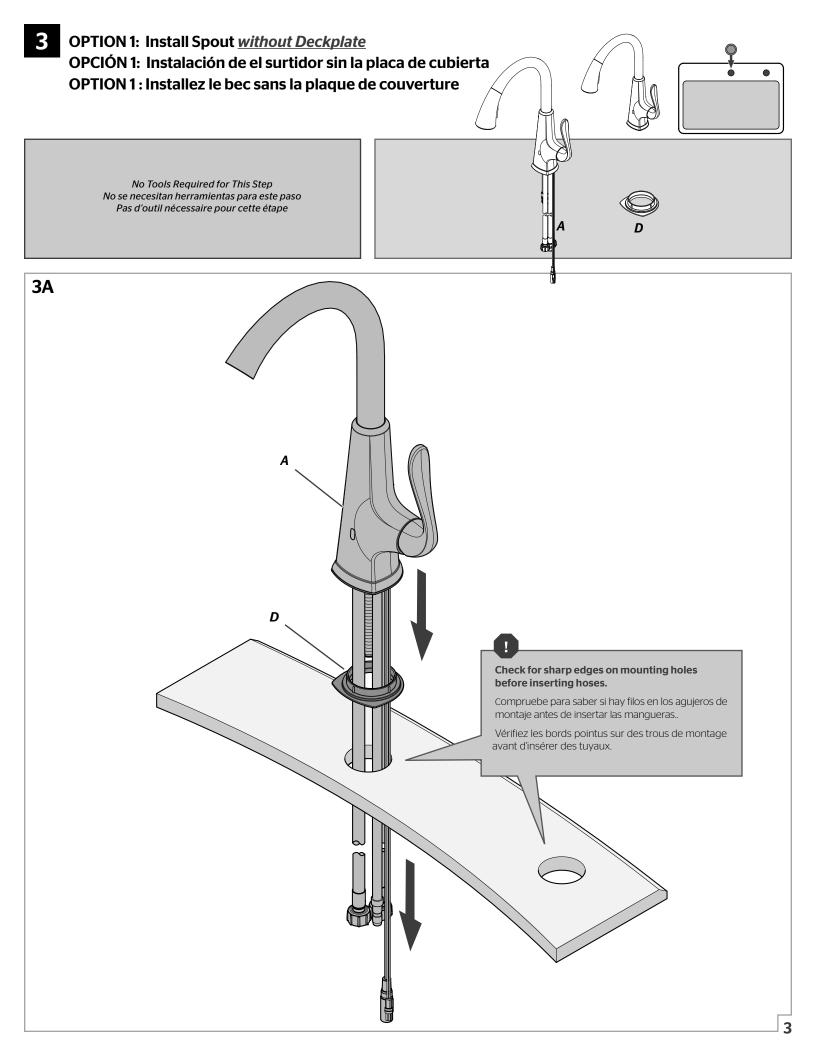

Locate water supply inlets and shut off the water supply valves. These are usually found under the sink or near the water meter. If you are replacing an existing faucet, remove the old faucet from the sink and clean the sink surface thoroughly.

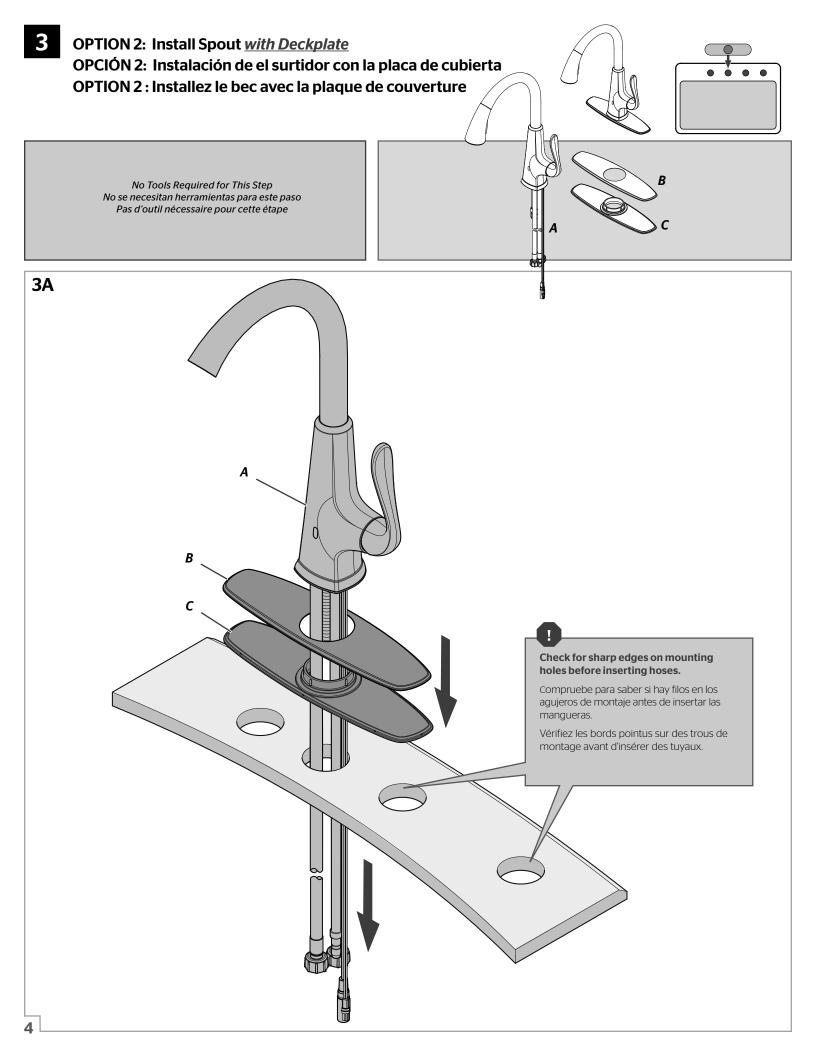

Ubique las entradas del suministro de agua y cierre las válvulas de suministro de agua. Generalmente se encuentran debajo del fregadero o cerca del medidor de agua. Si se trata de un reemplazo de grifo, quite el grifo vieio y limpie completamente la superficie del fregadero.

Recherchez les entrées d'approvisionnement et fermer les robinets. Ces robinets se trouvent généralement sous l'évier ou près du compteur d'eau. En cas de remplacement d'un robinet existant, retirez le de l'évier et nettoyer soigneusement la surface de ce dernier.

Faucet Functions Funciones del grifo Fonctions du robinet

To activate the spray mode, press top portion of button. By pressing bottom portion of button, the spray pattern will change between spray and stream while the faucet is in operation.

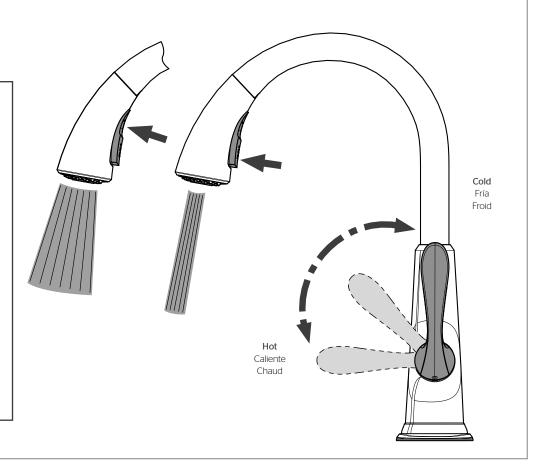

Note: The faucet will always turn on in regular stream mode.

Para activar el modo de aplicación, oprima el botón de la parte superior. Al presionar la parte inferior de botón, el patrón de pulverización cambiará entre rociado y flujo, mientras que el grifo está en funcionamiento.

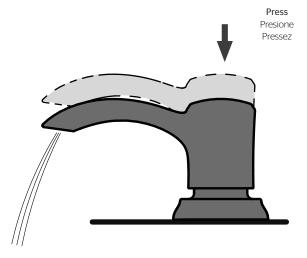

Nota: El grifo siempre se abrirá en el modo de flujo continuo.

Pour activer le mode de pulvérisation, appuyez sur la partie supérieure de la touche. En appuyant sur la partie inférieure de la touche, le jet va changer entre pulvérisation et écoulement tandis que le robinet est en fonctionnement.

Remarque: Le robinet s'ouvre toujours en mode flux régulier.
